## Chapter 1: Introduction

About This Book .....	2
Prerequisites .....	2
Instructional Design Philosophy .....	2
Using This Book .....	2
About the DVD .....	3
Images .....	3
Software Updates .....	3
Conventions Used in This Book .....	4
The SolidWorks MotionManager .....	4
Motion Study Purposes .....	5
History of the MotionManager .....	5
Motion Study Types .....	5
What Is the Output? .....	6
Animations .....	6
Basic Animation Concepts .....	6
Basic Workflow .....	7
Why Create an Animation? .....	7
Should We Ever Use a Video Camera? .....	8
Building Animations .....	8
Animation Results .....	8
When Is the Animation Finished? .....	9
Rigid Body Motion .....	9
Types of Motion .....	10
Which Motion Study to Use .....	12
Motion Drivers .....	13
MotionManager Pane .....	13
MotionManager User Interface .....	15

---

Model Tab .....	15
Motion Study Tab .....	15
MotionManager Components .....	16
Timeline and Time Bar .....	16
Key Points .....	17
Tooltips .....	17
Key Frames and Changebars .....	17
Completed Motion Studies .....	17
Completed Videos .....	18
Right Way/Wrong Way .....	18
Getting Help .....	19
Knowledge Base .....	19

## Chapter 2: Creating Simple Animations

Animation .....	22
Topics .....	22
Point-to-point (Key Point) Animations .....	23
Exploded Views .....	23
Case Study: Exploded Views .....	23
Animating Exploded Views .....	24
Animation Controller .....	24
Playback Options .....	24
Animation Timing .....	25
Review .....	26
The Animation Study Type .....	26
Animation Wizard .....	26
Stages in the Process .....	27
The Storyboard .....	27
Storyboard Development .....	27
Case Study: Animation Wizard .....	28
Storyboard .....	29
Rotate Model .....	31
Delete Existing Paths .....	31

---

Explode .....	33
View Orientation .....	35
Creating Viewpoint Keys .....	36
Viewpoint Playback .....	36
Modifying Key Points.....	37
Interpolation Modes.....	37
Collapse.....	40
Copying Key Points .....	41
Recording Animations .....	41
Video File Format.....	42
Image File Formats.....	42
Renderer .....	42
CODEC .....	42
Frame Rate.....	43
Partial Animations .....	43
Key Frame.....	44
Image Quality.....	44
Video File Output Size .....	44
Dragging a Component .....	47
General Sequence.....	47
Timeline Colors .....	47
Creating Reversed Animations.....	48
Motion Study Tabs.....	49
Review .....	49

### **Chapter 3: Editing the Timeline**

Editing the Timeline .....	52
Topics.....	52
Storyboard .....	53
Case Study: Editing the Timeline .....	54
How Explode Works.....	54
Scaling the Timeline.....	56
Timeline Symbols .....	57

---

Components .....	57
Key Points .....	57
Key Frames .....	57
Changebars .....	58
Editing Key Points .....	58
Drag Key Point .....	58
Control Drag Key Point .....	58
Copy/Paste Key Point .....	58
Drag Multiple Key Points .....	58
Edit Key Point Time .....	59
Moving the Time Bar .....	59
Component Appearance .....	61

## Chapter 4: View Orientations

View Orientations .....	66
Topics .....	66
Viewpoints .....	66
Positioning the Viewpoint .....	67
Middle Mouse Button Functions .....	67
Arrow Keys .....	68
Adjusting the Arrow Key Movement .....	68
Reference Triad .....	69
Named Views .....	69
Perspective View .....	70
Modify Perspective View .....	70
View Orientation States .....	72
Disable View Key Creation .....	72
Disable View Key Creation Cleared .....	72
Disable Playback of View Keys .....	72
Disable Playback of View Keys Cleared .....	72
Creating View Key Points .....	72
View Orientation Changes .....	73
Establishing Shots and Leaders .....	73

---

Case Study: Viewpoints .....	74
Storyboard .....	74
Editing Viewpoint Keys .....	79
Further Tweaking .....	81
Perspective View Effect .....	81
Case Study: Visual Bloom .....	81
Bounding Box .....	83
Alternative Methods .....	85

## Chapter 5: Animating Appearances and Properties

Animating Appearances .....	88
Topics .....	88
Changing Displays and Appearances .....	89
Interpolation Modes for Visual Properties .....	90
Case Study: Component Visibility Changes .....	91
Storyboard .....	91
Display States .....	94
Stored Display States .....	94
Display States vs. Configurations .....	95
Display Pane .....	95
Display Pane Icons .....	96
Selecting Display Pane Options .....	96
Creating Display States .....	97
Case Study: Changing Appearances .....	97
Storyboard .....	97
Graphics Display Modes .....	101
Rotation by Reference Triad .....	103
Case Study: Reference Triad .....	103
Animating Lights .....	105
Scene and Environment .....	105
Lock to Model or View .....	105
Lighting .....	106
Types of Lights .....	106

---

Creating Lights .....	107
Shadows.....	107
Lighting Coordinates .....	109
Positioning Lights .....	110
Spot Lights .....	110
Lights in Animations.....	110
Keep Light .....	110
Case Study: Lighting.....	111
Storyboard .....	111
RealView Lighting .....	116
Lighting Properties That Can Be Animated.....	116
Rendered Animations.....	117
Case Study: Rendering an Animation .....	118
PhotoView 360 Check.....	119
Choosing A CODEC.....	122
Saving a Series of Images .....	123

## Chapter 6: Free Component Motion

Overview .....	128
Topics .....	128
How Are Animations Calculated?.....	128
Master Animator/Assistant Animator .....	128
How Are the "Inbetween" Points Calculated?.....	128
The Solution Process.....	129
Free Component Motion.....	130
Keys.....	130
Autokey .....	130
Place Key.....	130
Replace Key .....	130
Motion Study Properties .....	131
Animation Properties.....	131
Move and Rotate Component .....	131
Triad .....	132

---

Triad Move and Rotate .....	132
Drag Rulers .....	132
Reorienting the Triad .....	133
Mates .....	133
Global Mates .....	133
Local Mates .....	133
Case Study: Free Component Motion .....	134
Storyboard .....	134
Scrub the Timeline .....	138
Reverse Path .....	140
Case Study: Alternate Solution — Motor .....	142
Duplicate Study .....	142
On/Off .....	144
Case Study: Alternate Solution — Mate .....	147
Screw Mate .....	147

## Chapter 7: Motion Drivers

Motion Drivers .....	152
Topics .....	152
Dragging Components .....	152
Mates .....	152
Suppressing/Unsuppressing Mates .....	153
Distance and Angle Mates .....	153
Path Mates .....	153
Mates in Sub-assemblies .....	153
Mating Strategies .....	154
Animating Robots .....	155
Mate Organization .....	156
Case Study: Robot Motion .....	156
Storyboard .....	156
Part 1: Mates .....	157
Mate Problems in Animations .....	162
MotionManager Filters .....	163

---

Motors .....	165
Motor Types .....	165
Motor Principles .....	168
Recalculating Studies .....	168
Defining a Motor .....	169
Part 2: Distance Motor .....	169
Motor Options .....	170
Where is Zero? .....	170
Reversing the Motion .....	173
Constant Speed Motor .....	174
Part 3: Constant Speed Motor .....	174
Constant Speed Motors—Alternate Method .....	176
Function Builder .....	178
Data Input .....	179
Data Export .....	180
Data Point Motors .....	180
Importing Data Points .....	180
Curve Fitting .....	181
Linear .....	181
Akima .....	181
Cubic .....	182
General Considerations .....	182
Part 4: Data Points Motor .....	182
Part 5: Segments Motor .....	184
Segment Interpolation Types .....	185
Part 6: Expression Motor .....	187
Function Builder—Expressions .....	188
Sub-assemblies .....	189
Rigid Sub-assemblies .....	189
Flexible Sub-assemblies .....	190
Case Study: Sub-assemblies .....	190
Modifying the Structure of an Assembly .....	192
Dissolving a Subassembly .....	192

---

Reorganize Components Using Drag and Drop .....	192
Reorganize Components .....	192
Promoting and Demoting Components .....	192
Troubleshooting Motor Problems .....	194
Case Study: Motor Troubleshooting .....	194
Moving around a Closed Path .....	197
Direct Path .....	197
Using Mates .....	199
The 100/360 Rule .....	200
How Do We Go Beyond 360 degrees/100 percent? .....	201
Motor Method .....	201
Case Study: Path Mate .....	202
Path Mate .....	202
Storyboard .....	202
Limitations of the Path Mate .....	205
Path Mate Percent Scale .....	206
What's Wrong? .....	206
Alternative #1—Suppress the Reset .....	207
Alternative #2—Two Path Mates .....	207
Alternative #3—Key Points .....	207
Alternative #4—Path Mate Motor .....	208
Path Mate Motor .....	208
Simulation Motion Drivers .....	210

## **Chapter 8: Animating Parts**

Animating Parts .....	212
Topics .....	212
Case Study: Animating In-Context Parts .....	213
Storyboard .....	213
Rebuilding In-Context Parts .....	214
Create an In-Context Part .....	214
Animating a Spring .....	219
Case Study: Create a Spring .....	219

---

Phase Shift .....	223
Rebuild Failures.....	224
Spring Diameter .....	224
Methodology .....	225
Case Study: Wheel Assembly .....	227
Question.....	227
Storyboard .....	228
Driving the Motion .....	230

## **Chapter 9: Physics-based Motion**

Physics-based Motion .....	236
Topics.....	236
Terminology .....	236
Motion Solutions.....	237
Animation of Physics-based Simulations.....	238
Driving Motion .....	238
Motors .....	238
Mates .....	239
Redundant Mates .....	239
Motion Study Properties .....	240
Case Study: Ball Sorter .....	241
Storyboard .....	241
Gravity .....	242
Contact.....	243
Contact Groups .....	244
Change the Animation Speed .....	246
Limitations .....	247
Mates .....	247
Motors .....	247
Damping.....	247
Force.....	247
Contact.....	247
Contact Friction.....	248

---

Coefficient of Restitution .....	248
Case Study: Impact .....	248
Case Study: Geneva Wheel .....	250
Storyboard .....	250
Contact Options .....	252
Restoring Force .....	254
Combining Motion .....	258
Case Study: The Bouncing Ball .....	258
Storyboard .....	259
Springs .....	260
Translational Spring .....	260
Magnitude of Spring Force .....	261
Damping .....	263
Creating a Spring .....	264
Importing Simulation Results .....	265
Errors .....	269
Complete the Spring Part .....	269
Physical Dynamics .....	270
Capturing the Screen .....	270
Image Capture .....	270
Record Video .....	270
Case Study: Physical Dynamics .....	271
Animating Gears .....	272
Case Study: Fly-Ball Governor .....	273
Storyboard .....	273
Animation Approach .....	273
Mates .....	274
Calculating Physics-Based Motion Studies .....	279
The PhysX Solver .....	279
SolidWorks Motion Solvers .....	282
Which Solver? .....	282

---

## Chapter 10: Alternate Methods

Alternate Methods .....	284
Topics .....	284
Planning the Animation .....	284
Case Study: Fly Ball-Governor .....	285
Alternate Approach .....	286
Case Study: Bouncing Ball .....	288
Oscillating Motors .....	288
Motors Driven by Expressions .....	290
Operators .....	290
Mathematical Functions .....	291
Variables and Constants .....	292
Driving Expression .....	293
Syntax .....	293
What Is the Best Way to Animate? .....	296
Case Study: Arbor Press .....	297
Storyboard .....	297
Method 1—Point-to-Point .....	298
Method 2—Mates .....	300
Method 3—Motors .....	303
Method 3—Motors (continued) .....	306
Method 4—Basic Motion .....	306
The Law of Simplicity .....	309

## Chapter 11: Introduction to Cameras

Introduction to Cameras .....	312
Topics .....	312
Camera Terms .....	313
Camera Rotation .....	313
Camera Translation .....	314
Positioning and Aiming Cameras .....	314
Camera Aiming Methods .....	315
Adding a Camera .....	315

---

Camera Options . . . . .	316
Target Point, Position, and Rotation . . . . .	316
Aiming the Camera . . . . .	316
Locking the Camera Position . . . . .	317
Camera Motion Controls . . . . .	317
Definable Camera Properties . . . . .	318
Case Study: Introduction to Cameras . . . . .	319
Camera Position and Target . . . . .	320
Percent Distance along Selection . . . . .	321
Editing a Camera . . . . .	324
General Sequence . . . . .	324
Multiple Cameras . . . . .	324
Show/Hide Cameras . . . . .	324
Cameras in an Animation . . . . .	326
Switching a Camera On . . . . .	326
Locking the Camera Position . . . . .	326
Camera Properties . . . . .	330
Camera Lenses . . . . .	330
Field of View . . . . .	331
View Rectangle . . . . .	331
Size of Field . . . . .	331
Case Study: Camera Lenses . . . . .	332
View Rectangle . . . . .	336
Camera Roll . . . . .	337
Camera Aspect Ratio . . . . .	339
View Area . . . . .	345
Case Study: Camera Movements . . . . .	346
Apparent Depth . . . . .	351
Case Study: Apparent Depth . . . . .	351
Standard Lens . . . . .	355
Depth of Field . . . . .	356
Use of Depth of Field . . . . .	356
Case Study: Setting Depth of Field . . . . .	357

Animation Speed.....	364
Rendering Quality.....	365

## Chapter 12: Walk-through Animations

Using Cameras in Animations.....	368
Topics.....	368
Case Study: Walk-through Animations.....	369
Storyboard.....	369
Editing the Target.....	371
Smooth Camera Motion.....	373
Case Study: Walk-through with a spline path.....	374
Storyboard.....	374
Create Intermediate Points.....	377
Walk-through Function.....	379
Walk-through Interface.....	380
Walk-through PropertyManager.....	380
Walk-through Control Panel.....	381
Walk-through Controls.....	382
Walk-through Mini Panel.....	383
Case Study: Walk-through Function.....	384
Storyboard.....	384
Reset.....	384
Saving the Walk-through.....	386

## Chapter 13: Using Camera Sleds in Animations

Using Camera Sleds in Animations.....	388
Topics.....	388
Camera Sleds.....	388
Creating a Camera Sled.....	389
Case Study: Camera Sled.....	389
Storyboard.....	390
Additional Practice.....	395
Case Study: Hitchcock Effect.....	395

---

Lens Focal Length.....	399
Focal Length vs. View Area .....	400

## Chapter 14: SolidWorks Motion

Chapter Scope.....	404
Topics.....	404
SolidWorks Motion.....	404
Motion Analysis Study Type .....	404
Why Motion Analysis for an Animation? .....	405
When to Use SolidWorks Motion.....	409
Case Study: Fly-Ball Governor.....	409
Alternate Choices.....	411
Review .....	412
Summary of Motion Drivers .....	413

## Chapter 15: Output and Post-Processing

Output and Post-Processing .....	416
Why Post-Processing?.....	416
Video Editing .....	416
Topics.....	416
Animation Output.....	417
Post-Processing Functions.....	417
Video Editing Programs .....	419
External References.....	419
Timelines .....	420
Video Compression .....	420
Transitions .....	421
Titles and Annotations .....	421
Looping.....	422
Parallel Processing.....	422
Frame Rate .....	423
Rendering Efficiency .....	423
Render to AVI or Images? .....	424

Case Study: Animations from Rendered Images .....	425
Other Choices .....	429
Case Study: Post-Processing .....	430
Storyboard .....	430
Create The First Clip .....	432
Create the Second Clip .....	433
Create the Third Clip .....	435
Post-Processing .....	435
Windows Live Movie Maker .....	436
Windows Movie Maker .....	437
Aspect Ratio .....	438
Use of Transitions .....	441
Consistency .....	443
Finish the Movie .....	443

## **Chapter 16: Advanced Topics and Problems**

Advanced Topics .....	446
Topics .....	446
Configurations for Animations .....	447
Case Study: Hand Punch .....	447
Storyboard .....	448
Clip 1: Assemble the Punch .....	449
Limit Mates .....	449
Establishing Shot .....	453
Clip 2: Show Assembly Action .....	455
Dynamic Section Cuts .....	455
Clip 3: Change Punch Tip and Die .....	461
Changing Configurations .....	461
Lock Mates .....	462
Mates .....	463
Clip 4: Cut Sheet Metal .....	467
Positioning Strategy .....	468
Motion Paths .....	469

---

The Animation Series.....	471
Post-Processing.....	471
Stroboscopic Effect.....	475
Case Study: Stroboscopic Effect.....	476
Stroboscopic Rate.....	477
Calculating Frame Rate.....	479
Chains.....	480
Chain Animation Setup.....	480
Chain Animation Considerations.....	481
Troubleshooting the Chain.....	485
Driving the Motion.....	489
Making the Animation Longer.....	489
Physics-Based Solution.....	490
Belts.....	492
The First Law of Animations.....	492
Animating the Belt.....	495
Moving the Marker.....	496
Motor Speed.....	497
Planetary Gear System.....	499
Storyboard.....	499
Preparatory Work.....	500
Mating Gears.....	502
Capture Appearance Settings.....	507
Case Study: Shadow Study.....	508
Display Considerations.....	509
Shadows in RealView.....	511
Moving the Lights.....	511
Recording the Results.....	514

## **Chapter 17: Advanced Topics with In-Context Modeling**

Animations Using In-Context Features.....	518
Case Study: Pencil Sharpener.....	518

Storyboard .....	519
Plan the animation.....	520
Preparation Work .....	521
Assembly Cut .....	522
Animate Appearances .....	528
Pencil Appearances .....	529
Viewpoints .....	529
Lengthening Your Animation.....	532
Case Study: Jigsaw .....	534
Storyboard .....	534
Procedural Appearances.....	535
Assembly Cut .....	537
Assembly Changes .....	538
Animation of the Jigsaw Blade .....	539
Bending Parts.....	544
Case Study: The Pipe Bender .....	544
Storyboard .....	545
The Pipe Part .....	546
Case Study: The American Flag .....	552
The American Flag .....	552
Sheet Metal Features .....	554
Case Study: SolidWorks Flag.....	555
Rectangular Flag.....	558
Case Study: Cable Winding Off a Reel .....	560
Storyboard .....	560
Cable Solution Method .....	560
Creating the Cable .....	561
Mate Function .....	563

## Chapter 18: Tips and Tricks for Better Animations

Putting It All Together.....	568
Planning .....	568
Storyboards .....	568

---

Animation Length .....	569
Lengthening Your Animation.....	569
Organization .....	569
Separate Assembly for Animation.....	570
Mates .....	570
Frame Rates.....	570
Post-Processing .....	571
Viewpoints/Cameras .....	572
Camera Tips .....	572
Establishing Shot .....	573
Title Shot.....	573
Credits .....	573
Rendering Efficiency .....	573
Do It the Easy Way.....	574
When Is the Animation Finished?.....	575
Consistency.....	575
Large Assembly Animations .....	576
Animation Tips and Tricks .....	576
The First Law of Animations .....	577

**xx**
